

Instructions for GSRN's Timing Improver

IMPORTANT – BE AWARE OF YOUR SURROUNDINGS

1) Pick a spot or place a coin on the floor and stare at it as if it were the back of a golf ball. This is very important as it will keep your focus on the ball during your swing.

For left and right handed golfers

2) Once you are comfortable with your golf stance and have your eyes focused on your mark on the floor, you are ready to swing.

3) For best results practise a 3/4 swing until you are comfortable with the feel of the Timing Improver.

ENJOY!

Packaging Instructions

1. **Important** – this is a golf swing training aid only and is not designed to hit golf balls or any other object.
2. **Be aware of your surroundings** – making sure you have ample space around you and you cannot make contact with any objects including ceiling fans, light fittings, furniture, people, pets or any living thing.
3. Pick a spot (or place a coin) on the floor and stare at it as if it were the back of a golf ball. This is **very important** as it will keep your head completely still during your swing.
4. Once you are comfortable with your golf stance and the Timing Improver in your hand (Inventor Clete Ryan recommends you hold it with the slight bend towards your backswing), and your eyes are focused on your mark on the floor, you are ready to swing.
5. For best results practice three-quarter swing until you are comfortable with the feel of the club.
6. **Golf Swing Tip...** For right-handers, (for left-handers reverse). During your backswing, try to keep your left arm straight and your right elbow is close to your body as possible. Also, at the end of your backswing, both of your thumbs should be pointed skyward. Now with your follow-through, imagine you are throwing a bucket of water over your left shoulder. 7., But this works and will help your golf swing.
7. This club is specifically designed with a high grade flexible shaft to suit all grades of golf swings.
8. **Remember. Practice does make perfect! Have fun and enjoy the benefits you will receive on the course by using GSRN's Timing Improver!**
9. **Enjoy!!!**

Backswing this way

Your Timing Improver has a curve to replicate the golf shaft under its maximum load.
